

Experiment-2

Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS

The screenshot shows the FLYBOOK application interface. On the left is a dark sidebar with a menu containing 'Login', 'Login Report', 'Customer Infos', 'Ticket Bookings', and 'Payments'. The 'Login' menu item is highlighted. The main content area is titled 'Login' and contains a form with 'Email' and 'Password' input fields, a 'Submit' button, and a 'Reset' button. The browser's address bar shows the URL: creatorapp.zoho.in/bodanapudurgaprasad0417.sse_saveetha/environment/development/flybook#Login. The top navigation bar includes the FLYBOOK logo, a 'Development' environment indicator, and a trial expiration notice.

The screenshot shows the 'Login Report' page of the FLYBOOK application. The sidebar menu is the same, but 'Login Report' is now highlighted. The main content area displays a table with login attempts. The table has columns for 'Email', 'Password', and an empty column. It lists three entries with their respective email addresses and passwords. At the bottom, it indicates 'Showing 3 of 3'.
